

**Eric Crosson**  
706 W. 34<sup>th</sup> #202 Austin, TX 78705  
(512) 222 - 9052 / [esc@ericcrosson.com](mailto:esc@ericcrosson.com) / [www.ericcrosson.com](http://www.ericcrosson.com)

**Bachelor of Science** in Computer Engineering at University of Texas 2016

**Recent classes** include embedded & real time operating systems, embedded systems design, computer architecture

**Interested in** automation, immutable pipelines, GNU/Linux, free software, logic and digital logic, machine learning

---

### Extra Curricular Activities

- Self-study of functional programming, infrastructure as code, formal verification
- Founding mentor to FIRST Robotics Competition (FRC) team 3529; mentor FTC, FLL, Jr. FLL teams

### Hobbyist programmer, GNU/Linux aficionado, Emacs appreciator

- Expertise in LISP, git, Ruby, C/C++, Python, Java, Perl, Bash, asm, L<sup>A</sup>T<sub>E</sub>X, documentation, CMake
  - Familiar with Octave, Haskell, JavaScript, Tcl, VHDL, S. Verilog, CI, DevOps, Docker, ACL2, Promela, FPGAs
- 

### Work Experience

#### ShoreTel- Software Engineer (2012 - 2013)

- Created IP Phone VNC client and unit test architecture/DSL for firmware regression

#### Intel- Post Silicon Validation (2013 - 2014)

- Managed tests to determine quality of hardware
- Wrote, executed tests to stress hardware components

#### Intel- Pre Silicon Validation (2014 - 2015)

- Created analysis engine for internal signals of 3<sup>rd</sup> party RTL
- Integrated DHCP model tests against project RTL

#### ShoreTel (2015 - Today)

- Creating dev build system and work infrastructure

#### Centaur Technology- Design Verification (2013)

- Integrated processor model with bochs emulating pre-silicon hardware in common OSes and tasks

#### Centaur Technology- Design Verification (2014)

- Created multicore PSE36/PAE x86 bytecode generator
- Designed, implemented true LRU in System Verilog

#### IBM- Cloud Infrastructure Services (2015)

- Community work with OpenStack
  - DevOps management of public cloud
  - Created API to manage production accounts
  - Fostered habit of working with patent teams
- 

### Self-motivated projects

- <http://www.github.com/EricCrosson>
- Programming contests in Java, C++ and z80 asm
- Wavelength to RGB conversion
- Founded competitive UIL computer science team
- Static image background extraction
- Eye-gaze projection software
- Cell-tracking image processing
- 4 degree of freedom robotic arm articulation

### Autodidactic

- Seeking knowledge from OpenCourseware, Coursera, edx, and other manuscripts
- Classes taken: machine learning, neural networks, big data, algorithms II, cryptography II, hardware security
