#### Eric Crosson

6109 Shadow Valley Dr Unit A Austin, TX 78705 (512) 222 - 9052 / esc@ericcrosson.com / www.ericcrosson.com

Bachelor of Science in Computer Engineering at University of Texas 2016

Recent classes include embedded & real time operating systems, computer architecture, neural networks Interested in blockchain, system architecture, artificial intelligence & robotics, security, formal verification

### Extra Curricular Activities

- Self-study of blockchain technology, functional programming, infrastructure as code, formal verification
- o Founding mentor to FIRST Robotics Competition (FRC) team 3529; mentor FTC, FLL, Jr. FLL teams

# Hobbyist programmer, GNU/Linux aficionado, Emacs appreciator

- Expertise in Lisp, git, Qt, C/C++, Ansible, Docker, CI, Python, Java, Perl, Bash, asm, IATEX, documentation
- o Familiar with DevOps, BitBake, Node.js, golang, CMake, Octave, Haskell, VHDL, S. Verilog, ACL2, Promela

#### Work Experience

### ShoreTel – Software Engineer (2012 - 2013)

Created IP Phone VNC client and unit test architecture/DSL for firmware regression

### Intel – Post Silicon Validation (2013 - 2014)

 $\circ$  Maintained & wrote tests to stress hardware components

### Intel – Pre Silicon Validation (2014 - 2015)

- Created analysis engine for signals of 3<sup>rd</sup> party RTL
- Integrated DHCP model tests against project RTL

#### ShoreTel (2015 - Today)

- o Architect of new dev infra and phone software
- Modernized development, testing & release processes
- o Created custom Linux distro for custom hardware

## Centaur Technology – Design Verification (2013)

- Integrated processor model with bochs to allow OSlevel emulation and testing of presilicon hardware
- Profiled, optimized, debugged, and documented presilicon simulator

#### Centaur Technology – Design Verification (2014)

- Created multicore PSE36/PAE x86 bytecode generator
- o Designed, implemented true LRU in System Verilog

### IBM – Cloud Infrastructure Services (2015)

- Community work with OpenStack
- DevOps management of public cloud offering
- Created API to manage production accounts
- Fostered habit of working with patent teams

#### Self-motivated projects

- o http://www.github.com/EricCrosson
- Autonomous objective-based drone operation
- Programming contests in Java, C++ and z80 asm
- $\circ\,$  Founded competitive UIL computer science team
- Cell-tracking image processing
- Eye-gaze projection software
- 4 degree of freedom robotic arm articulation
- Static image background extraction

### Autodidactic

- Seeking knowledge from OpenCourseware, Coursera, edx, and other manuscripts
- o Classes taken: machine learning, neural networks, big data, algorithms II, cryptography II, hardware security
